

write a query to display the instructor's last name whose mail ID starts with 'b' from the instructor table.

```
mysql> select last_name from instructor
       -> where email like 'b%';
Empty set (0.00 sec)
```

write a query to display the details of the student whose first name ends with the vowels from the student table.

```
mysql> select * from student_data
       -> where first_name like '%a'
       -> or first_name like '%e'
       -> or first_name like '%i'
       -> or first_name like '%o'
       -> or first_name like '%u';
```
